GROUP

# A GLOBAL PRESENCE

## GROUP PROFILE

After trailblazing ventures in the farming and production of Tea since 1920, Wearit Group stepped into the business of manufacturing Ring Spun Yarn in 1996. The Group has now transformed into a conglomerate of companies with varied interests, from Tea to Textiles.

Wearit has come a long way, establishing a wide customer base for its textile yarns across the globe. The Group has been progressing with its strong commitment to quality, innovation, customer satisfaction and has a production base of 4,000 MT per month of Ring Spun Yarn from its manufacturing facilities spread across India.

Using state-of-the-art technology and a range of imported fibers, Wearit desires to exhibit specialty blends and keep pace with the fast moving fashion world. Alongside, our R&D team has provided solutions to several highly technical segments including fire hose, conveyor belts, protective wear, filtration etc.

Our concept is to be a 'boutique spinner', where we customize the yarn according to specific requirements and design unique effects in our drive to become the market leader.

Our partnership with several garment exporters extends our credibility for quality, service and quick turnaround periods.
